What is the 3G-rule?

This means that each participant is only allowed to enter the regatta if they have been vaccinated, recovered or have been tested.

Vaccinated:

For people who have been vaccinated with an EMA approved vaccine, the following rules apply:

- The first vaccination is valid from the 22nd day after the 1st prick for a maximum of 90 days from the time of vaccination.
- The second vaccination is valid for a maximum of 270 days from the time of the second vaccination.
- Vaccines for which only one vaccination is intended (e.g. from Johnson & Johnson) are valid from the 22nd day after vaccination for a total of 270 days from the day of vaccination.
- For people who have already recovered and who have previously been vaccinated, the vaccination is valid for 270 days from the time of vaccination.

Recovery:

These are exempt from the obligation to test for 180 days after the infection has expired. Evidence includes, for example, a separation notice or a medical confirmation that an infection has been confirmed by molecular biology. Evidence of neutralizing antibodies counts for 90 days from the time of the test.

Tested:

- PCR tests are valid for 72 hours from sampling.
- Antigen tests by an authorized agency are valid for 48 hours from sampling.
- (Self-tests that are recorded in an official data processing system in the federal states are valid for 24 hours.
- Point-of-sale tests for one-time entry of sports facilities, business premises, restaurants, hotels or an event complete the offer.) I might not write the last two points in brackets, as this is confusing, instead:
- There is a test facility for PCR and antigen tests directly on the regatta site.
